Cliquer sur « Se fier »

## Connexion WIFI – Android

IMPORTANT : Votre mot de passe doit avoir été personnalisé

The image shows a screenshot of an Android Wi-Fi configuration screen for a network named "eduroam". The screen is divided into several sections, each with a dropdown menu. Red arrows with numbers 1 through 5 point to specific fields:

- Méthode EAP**: The dropdown menu is set to "PEAP". A red arrow with the number "1" points to this dropdown.
- Authentification phase 2**: The dropdown menu is set to "MSCHAPV2". A red arrow with the number "2" points to this dropdown.
- Certificat CA**: The dropdown menu is set to "Utiliser des certificats système". A red arrow with the number "3" points to this dropdown.
- Identité**: The text field contains "DA@cegeplimoilou.ca". A red arrow with the number "4" points to this text field.
- Mot de passe**: The text field is empty. A red arrow with the number "5" points to this text field.
